** The preterm infant delivered in the field?		IV			IN		IN			1	iN	IV	IV	IV	IN		-

This survey is in the best interest of the patients cared for in the Southwest Ohio Region, the 2024 ED Capabilities Survey questions are geared to summarize full service hospital Emergency Departments' capability to treat and admit specific prehospital patient emergencies. This effort is to soley supply the EMS provider with important information that can be used in the appropriate hospital triage of their patients.

This information is self reported and NOT verified.

Each EMS service with a Free Standing Emergncy Department should have a specific protocol as to what patients should be triaged to the free standing ED.
